- system 69–71, 92–95, 128–131, 558–560
 - definition 84–87
- system failure (*see* failure, system)
- system response quantity (SRQ) 41–44, 61, 66–67, 97–101
 - spectrum character 377–378, 418–420
- T experiments 161–162
- temporal refinement factor (*see* grid refinement factor)
- Thomas algorithm 265, 266, 270
- transformations
 - for solving differential equations 212–213
 - mesh (*see* mesh, transformation)
- truncation error 180–182, 190, 203, 301–304, 335, 349, 351–354
 - analysis 175–178, 344–345
 - analysis on nonuniform meshes 345–347
 - definition 175
- uncertainty
 - aleatory (*see* aleatory uncertainty)
 - blind
 - characterization 66, 70, 108–113, 119, 384, 386, 565–575
 - definition 51–57
 - epistemic (*see* epistemic uncertainty)
 - lack of knowledge (*see* epistemic uncertainty)
 - model (*see* model form uncertainty)
 - model input 97–101, 475–476, 558–560, 569–572
 - numerical 283–284, 288
 - parameter (*see* parameter uncertainty)
 - predictive (*see* predictive capability)
 - quantification, responsibilities 736–747
 - recognized
- validation
 - aspects 35–39, 374–375
 - definitions 22, 24, 25
 - difficulties 401–405
 - domain 41–44, 61, 378–381, 573–575
 - experiment 64–66, 372–388, 409–422
 - hierarchy 27, 388–396
 - metric (*see* validation metric)
 - plan 61, 593, 596
 - project-oriented 378–381
 - pyramid (*see* validation, hierarchy)
 - responsibilities 734–736, 738–747
 - scientific 375–378

- Validation metric 67–69, 474–476, 573–575, 611–615
 - area metric (comparing CDFs and p-boxes) 486, 524–548, 612–654, 655–663
 - definition 36, 374, 473
 - difference between means 484–486, 491–524
 - pooling (*see* pooling CDFs)
 - recommended features 486–490
- variability (*see* aleatory uncertainty)
- verification
 - calculation (*see* solution verification)
 - code (*see* code verification)
 - definition 13–14, 26
 - plan 61, 593, 596
 - responsibilities 204–205, 729–734, 738–747
 - solution (*see* solution verification)
- version control 151–153, 166
- von Neumann stability analysis 179
- weak solution 209, 211, 226
